token*

*Lace

THE 3 TYPES OF SOLSTICE TOKENS

Ottoman corsairs & Skerry garden tokens :

by placing a Skerry garden token on the space **occupied by the Galleon**, this Nation can block a celestial path.

Portuguese inventors & Astrolabe tokens:

by placing an Astrolabe token on a Singularity space, the Portuguese turn it into a space that can be used by all the Ships in game.

Dutch administrators & Lace tokens :

Thanks to the Lace tokens, the Dutch can obtain Crew members, Frigates, Fortresses or even Planets.

SELECTION OF SOLSTICE TOKENS

If a player chooses to play with the Ottomans, the Portuguese or the Dutch, it is during the game set-up, at the time of the selection of the Crew members, that he will choose the number of Solstice tokens to use until the end of the game.

The player **can choose from 0 to 3 tokens**, which he will place on Bonus slots (*Fig 1,a*).

Fig.1

You will not be able to obtain additional Solstice tokens during the game.

Note: since Solstice tokens are filling the Bonus slots on your player board, you won't be able to collect Bonus if you don't have any slot remaining available.

USING A SOLSTICE TOKEN

When the player plays the Crew member to use the Solstice token of his Nation ("Astronomer" for the Ottomans, "Engineer" for the Portuguese, "Commodore" for the Dutch), he releases one of the Bonus slots. For details on the actions of a Solstice token, refer to the *Explanation of the Crew members* of corresponding Nation.

Team specificity: the 2 players can divide the 3 tokens of the Nation.
