AIM OF THE GAME

At the end of the 9th round, the player with the most (Victory Points) wins the game.

COMPONENTS

- 51 Land cards
- 60 Character cards (5 x 12)
- 75 tokens (value 1, 5, 10 and 25)

LAND CARDS

There are 51 Land cards of 6 different types. Throughout the game, players explore Lands to expand their Realm. Each Land type has its own way to reward the players. The Land cards' backs depict the Omens. Each card back is different.

CHARACTER CARDS

There are 12 different character cards. Each player starts the game with one copy of each card. Character cards determine the turn order based on their initiative value, and trigger effects, as well.

THE CLAN OMENS

Omens may be good, or bad. How your Clan's Omens rank compared to the others changes each round. The card on the top of the Lands deck depicts the Clans' Omens for the round. During the game, you will use them to resolve ties when determining the turn order.

SETUP

A. Sort the Land cards by the number of players indicated and keep only the cards with a number less than or equal to the number of players. Put the other cards back in the box, they will not be used during the game.

EXAMPLE: for a 2-player game, keep the 2+ cards, and return the 3+ and 4+ cards to the box.

B. Each player chooses a clan and the corresponding 12-card Clan deck.

C. Give 2 Victory Point tokens to each player to place them in their Realm (the area of the table in front of them). Place the remaining tokens in the center of the table.

D. Each player shuffles their Clan deck, placing it face down in their Realm, and draws 5 cards as their starting hand.

E. Shuffle the Land cards and place the deck face down on the table to create the LAND DECK. Draw cards face up to create 2 Land rows below the Land deck. **Each Land row must contain as many Lands as there are players. The Land row furthest from the Land deck is considered the first.**

GAME SEQUENCE

The game is played over 9 rounds and ends when all players have 9 Land cards in their Realm. Each round is divided into 3 Phases: **ASSIGNMENT**, **RESOLUTION** and **END OF ROUND**.

ASSIGNMENT

Each player simultaneously selects a character card from their hand and places it face down in their Realm. When all players have selected a character card, reveal them.

RESOLUTION

The turn order for that phase is determined by the initiative value of the revealed cards. The player who played the lowest initiative value plays first, and other players proceed in ascending initiative order. Resolve ties using the clans' Omens. The clan that ranks the highest plays first.

During their turn, each player must perform the two following actions in this order:

- CHARACTER ACTION:** You must apply the effect of the character card you played this round (even if it is not beneficial to you). Then, discard it face up next to your Clan deck, making sure that all the Character cards you played so far are visible to the other players.
- LAND ACTION:** Select a Land card from the first Land row and add it to your Realm. Immediately gain the corresponding Reward. You must keep your victory points face down until the end of the game.

NOTE: Do not fill the first Land row's empty slots before the end of the round. The later you play in the turn order, the fewer choices you have when it is your turn to add a Land to your Realm.

END OF ROUND

When all players have performed their two actions, slide the second Land row down to replace the first Land row. Draw Lands from the Land deck to create a new second Land row. Then, each player draws cards from their Clan deck until they have 5 cards in hand, or their Clan deck is empty.

EXAMPLE: Round 2.

The available Lands are:

Players simultaneously reveal their selected Character cards:

BLUE and PURPLE are tied. The Clans' Omens give the initiative to BLUE.

So, the turn order for the round is:
BLUE > PURPLE > YELLOW > RED

1 : Land added in round 1

CHARACTER: The Hunter's effect applies, Blue gains 3 because Blue is the first player.

LAND: Blue takes the Meadow and gains 2 (1 for this Meadow and 1 for Meadow owned by Red).

CHARACTER: The Hunter's effect does not apply, because Blue is a neighbor who played before Purple.

LAND: Purple takes the Field and gains 4 (2 for each Field in their Realm).

CHARACTER: The Crafter's effect does not apply, because Yellow plays before red, who is a neighbor.

LAND: Yellow adds the River to their Realm and gains 12 (6 multiplied by 2 Rivers in their Realm).

CHARACTER: The Farmer will double the Land reward this round.

LAND: Red has to pick the last card, the Field. They gain 4 (2 multiplied by 2 because of the Farmer).

END OF THE GAME

The game ends when all players have 9 Land cards in their Realm. Players reveal their tokens, and gain an additional 5 bonus if their Realm contains 5 different Land types, or 10 if their Realm contains 6 different Land types. The player with the most Victory Points wins the game. In case of a tie, the tied player who ranks the highest in the Clan's Omens is the winner.

EXAMPLE: When the game ends, Marie has 57, 3 Fields, 2 Meadows, 2 Forests, 1 Village, and 1 River in her Realm. Because she has 5 different Land types, she gains an additional 5 bonus. Total: 57 + 5 = 62
